

CARE INSTRUCTIONS.

TO THE HOMEOWNER:

To maintain the as-new appearance of your tapware for many years to come it is important to follow these simple care instructions:

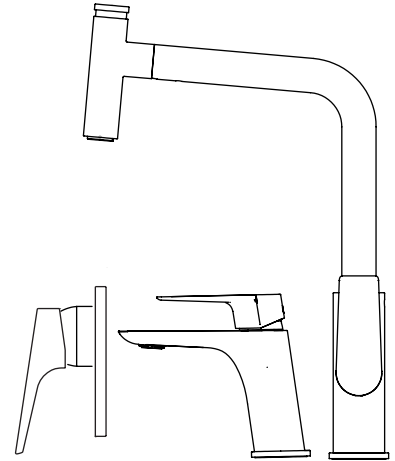

- To clean the surface from any marks (toothpaste, waterspots, food deposits etc), use a clean, soft cloth, that has been rinsed in warm water and wrung out well, and gently wipe clean. A mild soap solution may also be used on occasion.

- **DO NOT USE A MICROFIBRE CLOTH TO CLEAN OR POLISH THE SURFACE.**

These can carry fine particles and scratch the surface coating.

- **DO NOT USE ACIDIC, CAUSTIC/ALKALINE, ABRASIVE OR CITRIC CLEANERS.**

This includes bathroom/shower spray cleaners, cleaning powders, cleaning pastes, polishing agents, or cream based cleaners/cleansers. These can damage the coating and cause premature failure of the surface coating.

For full care instructions see **www.vodaplumbingware.co.nz/tapware-care-instructions/**

**PLUMBERS - PLEASE ENSURE THIS IS LEFT WITH THE
HOUSEHOLDER OR WITH THE INSTALLED TAPWARE.**
